Overview

(Also available in [silver](#)) The EHX-1020 is a dual-pass, triple-120mm fan heat exchanger, rated to about 1000W of heat dissipation. Three fans and a brushed aluminum shroud are included. This is the unit incorporated into Koolance PC4-1000 series systems, but provided separately for 3rd-party chassis integration.

When mounting in the top of a case, the EHX-1020 radiator will usually occupy the top 5.25" bay and *requires 2 inches (51mm) of space above an upper-mounted power supply*. Alternatively, Koolance offers the [ENC-1020](#) enclosure to mount this unit externally. 8 mounting screws and metal bushings are included.

NOTE: The EHX-1020 is not sold as a consumer-level product, and does not include instructions on mounting the unit into a chassis. Unless mounted in an external enclosure, it will require permanent modification to the computer chassis ([stencil available here](#)). If you are not familiar with cutting tools, or are not capable of safely performing such alterations to your case, please consider an [integrated](#) Koolance solution. Technical support with regard to chassis modification is not provided by Koolance.

Specifications

| | |
|--------------------------|--|
| Model | EHX-1020BK |
| Materials | Aluminum & Plastic Shroud, Aluminum Radiator |
| Tubing Size, ID | 1/2" (13mm), 3/8" (10mm), or 1/4" (6mm) |
| Product Dimensions WxHxD | 6.9" x 16.9" x 2.4" (17.5cm x 43cm x 6cm) |
| Product Weight | 3.4 lbs (1.5 kg) |

Components Included

Radiator with fan shroud, 3 x fans, 8 x mounting screws with bushings
